ett3 A3 Ground Truth · group packet · README v04

Pin-up Fri Oct 30 2026, 12 pm. 9 sheets, all 11 x 17 landscape. New in v04: D2 v04 is a site plan on the gaussian splat (two options), D3 v04 has the section on the splat side view and a plant table per zone.

D2 options

- **Option A (default, in the packet):** site plan of the whole scan footprint at 1:40, splat over the mesh top view, contours 0.25 ft (index 1 ft).
- **Option B (alternate):** detail plan at the fallen log, 1:10, with an inset of option A. It is in ett3-A3_packet_v04_altB.pdf (same packet, D2 swapped) and ai/ett3-A3_02_D2-patch-map-optB_v01.ai.
- To swap B in for the print set: print the altB PDF, or in InDesign relink page 3 to the option B .ai.

Which file to open

- **Review:** ett3-A3_packet_review_v04.pdf (every open slot boxed and numbered, slot list at the end). ett3-A3_packet_v04.pdf is the clean print set.
- **Draw:** ai/ett3-A3__vNN.ai, one per sheet (cover v07, D2 v06, D3 v06, sheet 08 v01, the others v05), or ai/ett3-A3_packet_v07.ai (all 9 artboards). Rasters are linked from links/.
- **Lay out:** indd/ett3-A3_packet_v06.indd (InDesign 2026) or indd/ett3-A3_packet_v06.idml. Each page places the sheet's .ai; your text goes on layer group-edit (styles A3-head, A3-body, A3-note, A3-proxy).
- Keep the indd/ folder together: the .indd links to indd/Links/.

Fonts

Public Sans (OFL). Mac: double-click each OTF in fonts/ > Font Book > Install. PC: right-click > Install. InDesign also picks them up from indd/Document fonts/.

Editing rules

- Work on a copy. Put your initials and a version in the name: ett3-A3_04_D3b-plant-drawings_v05_MK.ai.
- Never edit layers underlay or plan (locked). Draw on annot-field.
- Scans of hand drawings: 300 ppi, place on annot-field inside the frame.

Swap in field data

Copy 01_src/ett3-A3_field-data_PROXY_v01.csv to 01_src/ett3-A3_field-data_v01.csv, type the field values, and change source from proxy to field on each row you replace. Send it to the group; he re-runs the build and every P mark on that value disappears.

Plant IDs on the Site Photos page

All are tentative (from keyframes, not checked in the field). The list is in the lane QUESTIONS file; please confirm or correct.

Open slots (numbers match the review PDF)

Sheet	What	FIELD	DATA	CONFIRM	P
00 Cover	names, date, group to-dos	7	0	0	3
01 D1	group's Part A map, key, field notes	3	0	0	0
02 D2	patch outlines, north, upland edge	1	0	1	3
03 D3	water level, plot radius, s 0 bearing, P values	0	0	5	53
04 D3b	3 plant drawings, captions, drawn by	6	0	3	6
05 D3c	4 hand sections: name, s from / to	8	0	0	0
06 S1	north on scan	0	0	5	0
07 Data	station table	0	1	0	93
