ett3 A3 Ground Truth · group packet · README v02

Pin-up Fri Oct 30 2026, 12 pm. 8 sheets, all 11 x 17 landscape.

Which file to open

- **Review:** `ett3-A3_packet_review_v02.pdf` (every open slot boxed and numbered, slot list at the end). Mark up in Acrobat or Preview. `ett3-A3_packet_v02.pdf` is the clean print set.
- **Draw:** `ai/ett3-A3_<sheet>_v05.ai`, one per sheet, or `ai/ett3-A3_packet_v05.ai` (all 8 artboards). Rasters are linked from `links/`.
- **Lay out:** `indd/ett3-A3_packet_v04.indd` (InDesign 2026) or `indd/ett3-A3_packet_v04.idml` (any recent InDesign). Each page places the sheet's `.ai`; your text goes on layer `group-edit` (styles A3-head, A3-body, A3-note, A3-proxy).
- Keep the `indd/` folder together: the `.indd` links to `indd/Links/`. If InDesign or the IDML asks for links, point it at `indd/Links/`.

Fonts

Public Sans (OFL). Mac: double-click each OTF in `fonts/` > Font Book > Install. PC: right-click > Install. InDesign also picks them up from `indd/Document fonts/`.

Editing rules

- Work on a copy. Put your initials and a version in the name: `ett3-A3_04_D3b-plant-drawings_v05_MK.ai`.
- Never edit layers `underlay` or `plan` (locked). Draw on `annot-field`.
- Scans of hand drawings: 300 ppi, place on `annot-field` inside the frame.

Swap in field data

Copy `01_src/ett3-A3_field-data_PROXY_v01.csv` to `01_src/ett3-A3_field-data_v01.csv`, type the field values, and change `source` from `proxy` to `field` on each row you replace. Send it to Marko; he re-runs the build and every P mark on that value disappears.

Open slots (numbers match the review PDF)

Sheet	What	FIELD	DATA	CONFIRM	P
00 Cover	names, date, group to-dos	7	0	0	3
01 D1	group's Part A map, key, field notes	3	0	0	0
02 D2	patch outlines, north, KML trace	3	0	5	15
03 D3	plot features, legacy plant, plot radius, P values	4	0	6	95
04 D3b	3 plant drawings, captions, drawn by	6	0	3	6
05 D3c	4 hand sections: name, s from / to	8	0	0	0
06 S1	north on scan	0	0	5	0
07 Data	station table	0	1	0	93
